

Privacy Policy

Bible Reader app

The Privacy Policies of the Bible Reader app were updated on 12/22/2023.

In the paragraphs below, the term “user” refers, in the singular, to people who use the Bible Reader application, developed and maintained by Zoe Psomí.

If the terms "application" or "app" are found separately in this text, these terms will be referring to the Bible Reader application.

Collection and Use of Personal Information

Personal information is data that can be used to identify or contact a person.

Our application does not collect any personal information from the user in the free mode of the app, and consequently does not use any type of information of this nature if the user chooses not to purchase subscription plans.

On the other hand, if the user wishes to purchase one of the subscription plans available in the app to access exclusive features for subscribers, the application in this case collects and uses the following user information:

- **E-mail address:** necessary to uniquely identify the user in our system and for eventual communications with our customers.
- **Name:** not mandatory, but useful to enable us to identify and communicate more friendly with our users.

Collection and Use of Non-Personal Information

Non-personal information is data that does not, by itself, permit direct association with any specific individual.

The application asks the user to enter a password during registration when purchasing a subscription plan. The purpose of this password is to allow us to authentically identify this user when accessing the application on the different platforms and devices supported by the app.

Our app also collects usage data to generate and analyze statistics, such as:

- User-selected elements on the screen, such as buttons and menu options.
- Screens accessed by the user.
- Choice made by the user in dialog windows with two or more response options.
- Etc

Once collected, this data is sent to the Google Analytics service, a tool that helps us better understand user behavior, which in turn allows us to make more assertive and accurate decisions regarding how we can continually improve the user experience of our app.

Cookies and Other Technologies

Our app makes use of Google Firebase technology to extract and send app usage data and reports on errors that occur on users' devices while running our app.

The purpose of this is to enable us to monitor and correct errors occurring on the different types and models of our users' devices, without necessarily needing to have these devices in our own hands to discover, test and correct these problems.

Disclosure to Third Parties

We do not disclose, promote, distribute or send, by any means, application data to third parties, whether individuals or legal entities.

Children and Education

The use of this application does not present any risk to children or their education, although it also does not present any concrete benefit to the child if they do not yet know how to read or do not have a clear understanding of how to plan their Bible reading through the use of our app.

Location-Based Services

The functioning of our application does not depend on the user's geographic location, and for this reason the app does not collect or use any data relating to the user's position or geographic location.

Third Party Sites and Services

Below is the list of third-party services used by our application and the purpose for which each of these services is used:

- **Google Firebase:**
 - user maintenance and authentication.
 - storing users' backup files in the cloud.
 - collecting app usage data and reporting errors occurring in the app.
- **RevenueCat:** payment and billing management service on Android and iOS platforms. This is the service we use to sell the subscription plans offered in the application.

International Transfers

We do not carry out any type of international operation related to the Bible Reader application.

Our Commitment to Your Privacy

To ensure the effectiveness of our privacy policy, we communicate to everyone involved in the application project about the existence of this document and ask that each one read it and ensure compliance with all the guidelines described in it.

Privacy Questions

If you have any questions about our privacy policy for the Zoe Psomí app, please contact us via the page <https://www.zoepsomi.com/en/contact> and we will respond to you as soon as possible.

This document may be updated at any time. When any update to our privacy policy is made, this will be notified together with the update notes of the new version of the Zoe Psomí application that has caused the need to change the terms of our Privacy Policy.
